YUHAO WU

[redacted]

EDUCATION

Singapore University of Technology and Design (SUTD), Singapore — 2023 – Present

Ph.D. Student in Natural Language Processing

Tsinghua University, Beijing, China — Nov. 2024 – Present

Visiting Ph.D. Student at Knowledge Engineering Group (KEG)

Huazhong Agricultural University, Wuhan, Hubei, China — 2018 – 2022

Bachelor's Degree in Mathematics

INTERNSHIP EXPERIENCE

Intern Researcher in Long-context & RL at Zhipu AI — Beijing, China — Sep. 2024 – Present

- Participating in the GLM-Zero project, mainly focusing on data construction for Long-COT for General Tasks, Reward Model design, Benchmark evaluation, and RL training.
- Contributed to the development of GLM-4-Z1, an open-source large language model with 32B parameters. The model outperforms larger counterparts like DeepSeek-R1 and QwQ-32B in reasoning tasks.

NLP Algorithm Intern at Trip.com — Shanghai, China — Jul. 2021 – Oct. 2021

- Applied NLP and machine learning algorithms to analyze and extract insights from business-related text data, improving short-text matching accuracy by 90%.
- Assisted in designing, mining, and constructing knowledge-based inference and intelligent dialogue response systems to support customer service automation. First author of a patent, which has been granted. (CN Patent Number: 202111234433X)

RESEARCH PROJECT

Writer-Zero is a reasoning model specialized for *creative writing composition*, a task demanding lots of logical and cognitive thought processes. Our current empirical experiments demonstrate that a R1-like inference-time scaling approach can effectively elicit these cognitive behaviors, outperforming other models in *win-rate* across creative composition task. Starting from a base model, we perform continual pretraining on diverse writing datasets. We then apply writing-task-specific reinforcement learning to refine and perfect the model's creative composition capabilities.

ACADEMIC RESEARCH

- **Yuhao Wu***, Yushi Bai*, Jiajie Zhang, Xin lv, Roy Ka-Wei Lee, Juanzi Li, "LongWriter-Zero: Mastering Ultra-Long Text Generation via Reinforcement Learning" submitted to NIPS 2025.

♡ Awards

National First Prize, 2020 National Mathematical Modeling Competition for College Students. Served as team leader, responsible for major modeling and programming work. Sep. 2020

National First Prize, 10th MathorCup Mathematical Modeling Competition. Ranked among the top 3 research teams nationwide. May 2020
