教育经历

大连理工大学

化学工程硕士　2011 年 9 月-2013 年 6 月

高分子材料工程学士　2007 年 9 月-2011 年 6 月

工作经历

宝洁中国营销有限公司

客户供应链高级经理　2022 年 8 月- 至今

- **销售订单计划和进销存管理：**负责零售大客户供应链线上线下业态的联合销量预估和订单计划，通过 VMR 项目实现由宝洁替代客户进行门店级别下单，实现 5% 的销量增长，100%品类实现供应链提前 30 天销量预估，提前订单率从 30%提升至 75%。**进销存管理：**负责物流配送、库存管理、缺货管理、损失消除等供应链日常策略制定、上下游协调管理和异常解决，帮助客户订单满足率从 95% 提升至 98%，库存金额下降 45%.
- **供应链中台管理：**负责中国区供应链关键指标中台管理、系统流程制定和损失消除。领导团队进行数字化转型开发销量权重有货率指标、缺货自动归因系统、缺货自动预警系统和分销同步系统，货架有货率从 96%提升至 98%，连续 3 年获得全球第一。即时零售中台，分析不同履约模式下的仓网结构，履约模式和成本结构，提供有货率提升和定制化包装的解决方案。
- **项目管理：**领导供应链零供一体化项目(仓网协同布局/工厂直送/共享仓/门店直送/客户自提/VMI 等项目)，数字化转型(订单和送货全链路 EOSB/质检报告自动传输/关键指标看板/数据直连)，降本增效项目(库存优化/循环 PDQ/ 0 天付款) 等项目，项目多次获得行业奖项(ECR/CCFA)，累计价值创造价值 3000 万以上。

江苏宝洁有限公司

供应链产品创新中心高级经理　2019 年 12 月- 2022 年 7 月

- **供应链启动：**负责搭建宝洁洗护类高端产品柔性供应链，领导团队建立 3 个宝洁全球第一套柔性生产系统，减小 90%MOQ，覆盖 90%现有配方和 70%包装种类，并将高端新产品在宝洁工厂生产比例从不到 10%提高至 45%，年创造成本节约超 3 百万美金。项目包括厂房新建、产品选品、设备及原料采购、生产启动、生产 SLEA 制定、生产计划排产等关键步骤。
- **新产品研发：**11 个月从 0 到 1 开发全新品类“潘婷深水炮弹发膜”在宝洁工厂的生产能力，包括新供应链设计，全新生产平台和包装材料研发和质量提高。项目节约 30%的产品成本和 60%的材料成本，形成标准化推广给全球，并被选为事业部优秀案例向全球总裁汇报。
- **项目管理：**通过产品考核矩阵和预考核，减少新品上市中 50%产品测试和考核时间，以及 80%以上的投资，并降低 85%产品最小起订量；整合上下游资源，逐步建立从产品概念到产品上市一站式创新中心，提供完整产品解决方案，提供电商新品快速生产迭代能力和消费者调查样品试生产能力。

技术部/新项目高级经理　2017 年 10 月-2019 年 12 月

- **项目管理/新品导入：**供应链新品导入负责人，负责洗护类年超过 20 个新品在太仓工厂生命周期管理和新项目启动流程化。通过新项目主计划管理，协调各项目组资源预算，变更管理和定期风险回顾，将供应链新项目一次成功率从 81% 提高到了 95%，新项目导致的质量事故 100%消除，同时也减少 97%项目可行性研究不足带来的追加投资。
- **供应商管理：**负责原材料和包装材料供应商日常 KPI 管理和优化，包括新供应商开发，新产品材料的考核及材料供应链本地化；建立供应商材料质量管理体系，年减少材料缺陷数量 30%；推进材料成本优化，年实施超过 200 万美金材料成本节约项目。
- **成本节约：**领导团队与研发团队进行工艺技术转移，优化香波生产工艺控制体系，提高全配方生产一次成功率至 99.9%。通过对生产工艺的优化，平均减少 15%香波批次生产时间，生产周期效率位列全球第一。优化现有包装结构，推进物流循环包装/直运包装和堆叠方案优化，减少了对应产品 95%的二次包装成本，提高 10%-15%的物流车辆空间利用率。

包装部高级经理　2013 年 7 月-2017 年 10 月

- **精益生产：**领导江苏宝洁最大的部门 (80 位全职员工, 110 个合同工)，部门生产稳定性指标位列全球同类工厂前五，材料利用率指标为全球第一。运用价值流分析进行**产能提升**，识别上下游产能瓶颈，实施制造包装产线互联互通项目将和包装产品线重布局，提升 25%最大产能。通过 **SLEA 优化**，在产量提升同时减少 30%转产次数，通过 JIT 的项目提升生产计划灵活度从 2 天更改 1 天更改。同时，领导团队进行**精益制造**，年实现 7-10%生产成本节约，转产速度提升 40%；
- **自动化转型：**推动香波包装线生产线自动化改造，投产自动放瓶、装箱、叠堆、转产，减少 60%的合同工使用量同时，将转产时间减少 13%。通过数字化升级，实现原有 6 个独立生产电子系统的数据交互，优化 23 个每次转产需要修改的本地操作至一键解决。通过生产线质量过程控制改造，针对关键质量点进行闭环反馈自动调节和视觉控制，减少 75%的消费者和客户质量投诉和 100%法规相关投诉。

奖励

Rating 1 绩效考评；宝洁总裁奖；宝洁中华区 Ruby 奖；

优势

- 供应链计划，项目管理，新产品导入，供应链精益制造，日化包装技术和材料。

Jason Zheng

EDUCATION

Dalian University of Technology, Dalian, China.

Master of Chemical Engineering（Polymer Science） Sep 2011-Jun 2013

Bachelor of Polymer Materials and Engineering Sep 2007-Jun 2011

CAREER PATH

Procter &Gamble China (Sales) Ltd.

Senior Manager, Customer supply chain **Aug 2022 – Till Now**

- **Supply Chain Management：** Responsible for collaborative forecast and sales order plan for retailer KA. Leads vender manage replenishment project, P&G controlled customer to place store level replenishment order, result in 5% POS improvement, all categories achieve 30days advanced forecast for production, with advanced order rate improved from 30% to 7%. I also lead logistic supply, loss elimination, inventory and availability management of offline retailers KA, coordinating up/downstream supply strategy and abnormal handling, helping customer order fulfillment improve from 95% to 98%, inventory 45% reduction, advance order rate improve from 30% to 75%.
- **Central desk of supply chain：** Manage China market service KPI, develop standard process, master plan and loss elimination of on shelf availability(OSA)/service as measured by customer(SAMBC). Lead digital transformation of weighted OSA/auto root causing/auto alerting/auto assortment system and improve China OSA from 96% to 98%, winning global benchmark for 3 past years. As instant retail business central owner, lead analysis and supply strategy of network, service model and cost structure, and provide customized package and availability solutions.
- **Project Management：** Lead one supply chain projects (supply network design/direct plan ship/one roof/direct store ship/customer self-pick/VMI etc), digital transformation (EOSB/Autor quality certificate report/KPI dashboard/customer data transaction), Cost saving (Inventory Optimization/Reusable PDQ/ 0 day payment), winning industry award multiple times(ECR/CCFA), with total value creation >30MM.

Senior Manager, Program Leader of Taicang supply chain innovation center, haircare **Dec 2019- Jul'2022**

- **Project Management:** as supply chain innovation center leader, responsible for establishing flexible supply chain for P&G premium and super premium products. Successfully lead to install and qualify 3 new to P&G global flexible production system, with 90% MOQ reduction, whose capability cover 90% of existing formula and 70% shapes of package respectively. With these, ratio of P/SP new initiatives in house increased from 10% to 45%, with financial return 2MM$/Y. Project covers from new building construction, production portfolio selection, equipment and raw/package material purchasing and delivery, new production start up, manufacturing SLEA establishment, production plan optimization etc.
- **New Initiative Development:** From "0" to "1" develop hero sku "Pantene hair bomb ROT" in house production capability, including new supply chain set up, new packing platform development and new package material development, bringing 30% and 60% cost reduction for finish product and material respectively. The machine / packing material package has been standardized and roll out to global platform. The project is also selected as golden case to present to global CEO David Tylor.
- **Project management:** Also responsible for new initiative launch model optimization, reducing 50% product qualification time, 80% capital investment and 85 minimum ordering quantity via product menu establishment and pre-qualification. By integrating up/down stream resources, in progress to set up one stop innovation center from product conceptual to NI launch, with total solution of new product, aiming to provide fast test and learn pace for E-commerce and agile prototype capability of consumer learning.

Senior Manager, MPD department and Site initiative Management **Oct 2017-Dec 2019**

- **Project Management and New Initiative Management:** responsible for over 20 new initiative projects life cycle management in TC plant and new initiative launch process optimization. Leveraging master plan management, resource/budgeting management, change management and regular risk/mitigation plan review, improved new initiative right first time successful rate from 81% to 95%, 100% related quality issue elimination and 97% avoidance of capital upcharge due to insufficient feasibility study.
- **Supplier Management:** As material, process and delivery department manager, responsible for raw/package material daily supplier management and quality improvement, including new supplier qualification, new material qualification and supplier localization, annually deliver >2MM$ material cost saving. Meanwhile, I lead the material quality system organization and work process set up, reduced material defect by 30% YOY.
- **Cost Saving**: I lead technical transfer from R&D to site, optimizing shampoo making process control strategy and help shampoo batch production one time successfully rate to 99.9%, reducing 15% batch production time. With these result, Taicang plant batch cycle time achieved global benchmark. For package part, implement recycle package, direct to consumer package and pallet optimization, reduced 95% relevant package cost, improving 10-15% truck space utilization.

Senior Manager, Packing department manager **Jul 2013-Oct 2017**

Report to: Director, Haircare supply chain leader; Origination size: 80 FTEs;

- **Lean Manufacturing**: Lead biggest department of TC plant (80 FTEs, 110 contractors), key result is global benchmark material utilization and top 5 ranking production reliability. By implementing value stream mapping, set up de-bottle project of making, packing system synchronization and packing re-platforming, increased 25% supply chain installed capacity. With SLEA optimization, and multiple projects implantation, e.g. JIT, RCO, ECRS, reduced

30% changeover rate and improves planning firm zone from 2 days to 1 day. Meanwhile, by implementing lean manufacturing, delivery 7-10% manufacturing cost reduction annually.

- **Manufacturing Automation:** Lead packing line automation upgrading, reduced 60% contractor usage via successfully starting up NGRU, case packer, palletizer and auto changeover. With digitization, achieved semi-auto data integration of 6 independent production digital systems, also improved changeover digital touches from 23 touches every time to 1 click. Establish quality process control strategy, leveraging close loop feedback auto-adjustment and vision system for key quality control points to reduce 75% consumer and customer complaints, 100% legal and regulation related complaints.

REWARDS

Rating 1 performance assessment; P&G CEO award; P&G GC Ruby award;

KEY COMPENTENCE

Supply Chain Planning/Project management/Lean Manufacturing/Packaging technology and material/Global team collaboration.
